Photography

BEGINNING Beginning is intended for someone new to a dSLR camera. We get students started in a right direction, and include exposure controls, camera menus, lenses and touch on composition. We explore the creative controls on the modern digital camera. Students will learn the basics of working with an adjustable camera, including f-stops, shutter speeds, "ISO" speed, lens and more. Students focus may be action, portraits or nature/landscape.

INTERMEDIATE This class picks up where Beginning Photography leaves off. Students go beyond the basic point-and-shoot practice of a digital camera (single-lens reflex models preferred) through classroom discussions and hands-on with the camera in various locations around the Grand. Students will explore more complex and sophisticated digital photography techniques, including night photography and more in-depth on exposure concepts. Students will need to have taken a Beginning class already or have instructor approval.

ADVANCED This class continues the Intermediate Photography offering. The Advanced class is usually more driven by student's interests and needs. There are things that will be included — exploring light, whether "available" found around the building or "created" with use of off-camera sources and with tabletop "still-life" set-ups. Students will explore more complex and sophisticated photography techniques, delving into composing issues, more in-depth on exposure concepts, night photography and portrait ideas. Students will need to have taken an Intermediate Photography class already or have instructor approval.
